

2011-2012 NPDES Staff Training

In house staff training meetings was held to renew the emphasis on Stormwater Pollution Prevention, disposing of contaminated waste and household hazardous waste and applicable Best Management Practices.

In attendance were the Public Works Supervisor and Public Works Foreman and staff, as well as the City Engineer. Separate individual tailgate meetings were held with those staff not able to be present at the formal meetings.

An independent meeting was held with the Associate Planner, Staff Planner and City Engineer to review Planning Development related requirements under the MS4 Permit. Planning staff has made an emphasis to increase landscape areas and reduce impermeable areas on development plans.

The City newsletter, which is provided to the public and staff, periodically included pollution prevention reminders.
